

DRILON SAITI

FULL-STACK SOFTWARE DEVELOPER | BACKEND ENGINEERING

Kumanovo, North Macedonia | +389 70 602 153 | drilon-saiti@hotmail.com
drilonsaiti.github.io | linkedin.com/in/drilon-saiti

PROFILE

Full-stack developer with 3+ years of professional experience delivering production features across e-commerce, CRM/ERP and subscription-based platforms. Primary backend expertise in PHP/Laravel, with additional experience in TypeScript/NestJS and Java/Spring Boot. Frontend focus on React, Next.js and Vue.js, alongside strong SQL database foundations. Experienced with REST APIs, authentication, third-party integrations, payment workflows, CI/CD deployments and Linux-based environments, with a focus on clean, scalable and reliable software.

PROFESSIONAL EXPERIENCE

Independent Software Developer — Freelance

Feb 2026 – Present

Remote

- Built a production-ready wedding guest management platform using Next.js, Supabase, TypeScript and Tailwind CSS, including guest photo sharing, name-based seat lookup and an administration dashboard.
- Implemented an interactive drag-and-drop seating designer with per-seat positioning, collision detection and public venue visualisation.
- Developed additional production applications including a Next.js POS/inventory platform and Symposium, a Laravel-based conference management system using Meilisearch.

Full-Stack Software Developer — NDRIT GmbH / MediaSoft DOOEL

Jan 2024 – Jan 2026

Remote

- Worked on multiple live production systems including e-commerce platforms, CRM/ERP systems and subscription-based applications.
- Developed and scaled core business functionality, third-party integrations, payment workflows, data-driven features and complex business logic used in real customer environments.
- Contributed across the full development lifecycle from feature development through CI/CD production deployments, collaborating with backend, frontend, QA and product teams.

Web Developer — PurpleDot

Jan 2023 – Jan 2024

Skopje, North Macedonia

- Developed and maintained full-stack web applications using PHP/Laravel on the backend and React/Vue.js on the frontend.
- Built and consumed REST APIs to connect frontend interfaces with backend services and databases.
- Debugged application issues and collaborated closely with the development team to ship production features.

TECHNICAL SKILLS

Backend: PHP (Laravel), TypeScript (NestJS), Java (Spring Boot)

Frontend: React.js, Next.js, Vue.js, JavaScript (ES6+), HTML5, CSS3, SASS, Tailwind CSS, Bootstrap, Mantine UI

Data: PostgreSQL, MySQL — database design, relationships, migrations, query optimisation

APIs & Security: RESTful APIs, authentication & authorisation, frontend-backend integration

DevOps & Systems: Git, GitHub, CI/CD pipelines, Linux, Apache, Nginx, deployment and environment management

AI-Assisted Development: Cursor, Claude Code, Junie — code generation, debugging, refactoring, codebase analysis and development workflows

EDUCATION

Engineer in Information Sciences and Computer Engineering

SS Cyril and Methodius University, FCSE | Skopje, North Macedonia | 2018–2022
